

## ROOFLOCK COATING SYSTEMS

### ROOFLOCK 1070 FOR GUTTER WATERPROOFING

## METAL GUTTER WATERPROOFING AND REFURBISHMENT – single layer coating

Rooflock 1070: A single-layer gutter waterproofing system for refurbishing and protecting metal central valley gutters and eaves gutters.

#### Time & Labour Saving

Developed to save labour and time on site, this latest-generation coating system is applied as a single layer to the gutter substrate, giving substantial cost savings.

#### 15 year warranty

With warranties of up to 15 years available, you have the assurance of a high performance and durable system. (For projects requiring a warranty, Rooflock must be consulted prior to commencement of the project).

#### BENEFITS

- Up to 15 years warranty available\*
- Single coat application with simple joint reinforcement - reduced installation times
- Moisture tolerant
- Incorporates rust inhibiting primer for long term protection
- Solvent free and odourless
- No disturbance or loosening of roof sheets – does not cause leaks elsewhere
- Cold applied
- UV resistant

#### SUBSTRATES

- Steel
- Galvanised steel
- Cast iron\*\*
- Concrete\*\*
- Fibre cement\*\*

\*\* Contact Rooflock technical team concerning these substrates.

\* For projects requiring a warranty, Rooflock must be consulted prior to commencement of the project
