

FLOWLOCK FCS 110E

POURABLE, EPOXY-BASED CRACK SEALING SYSTEM

Flowlock FCS 100E is a low viscosity epoxy compound formulated specifically for pouring or injecting into concrete and masonry.

Used primarily for crack sealing and repair of concrete floors prior to application of a floor coating system.

USES

- Crack sealing and repair of concrete floors
- Crack sealing and repair of general concrete or masonry
- Accepts both Epoxy and Polyurethane floor coatings systems
- Crack width 1 – 10mm
- (Do not use in expansion joints or regions prone to movement)

BENEFITS

- Pourable
- Self-levelling
- Excellent penetration into capillary cracks
- Aggregate can be mixed in for additional strength and economy
