

## FLOWLOCK JRS 440

### FLEXIBLE SEALANT SYSTEM FOR EXPANSION JOINTS

Flowlock JRS 440 is a single component, elastomeric sealant system for sealing horizontal expansion joints in concrete floors. It has excellent resistance to abrasion.

As a pourable sealant, a very easy, self-levelling seal is achieved with excellent adhesion to the existing substrate.

#### USES

- Sealing horizontal expansion joints in concrete floors
- Protection of concrete floors at expansion joints and terminations

#### BENEFITS

- Very easy to use – pourable and self-levelling
- No shrinkage.
- Very good resistance to abrasion.
- Quick curing time.
- Very good chemical resistance to hydrocarbons, greases, diluted acids and alkalis.
