
FLOWLOCK RE 370

EPOXY REPAIR MORTAR FOR CONCRETE FLOORS

Flowlock RE 370 is a high strength, quick-cure repair mortar for industrial floors exposed to heavy wheel traffic. It has very high impact and chemical resistance and can be applied down to 0.5mm thickness.

Full cure takes only 2 hours, allowing areas to quickly return to full use.

USES

- Repairs of concrete floors and surfacing – quick cure time
- Applications bearing heavy wheel traffic and use.
- Concrete floor repair and refurbishment prior to application of a Flowlock Floor Coating System
- Minimum thickness 0.5mm
- Maximum thickness 50mm (Flowlock 257 Aggregate must be mixed in for repairs in excess of 5mm thickness)

BENEFITS

- Quick cure, allowing areas to quickly return to full use.
- High mechanical strength and high resistance to impacts.
- Very high chemical resistance
- Very good adhesion to concrete.

COVERAGE

Estimated coverage is 17.5 litres volume per 35 kg kit.
